The man who rules Russia from now on is going to have to know how to fight without gloves.

The Ladies of the Baptist church will serve court day dinner in the store-room vacated by E. W. Harris.

Economy has become the universal watchword. Even the princess slip requires less material than of yore.

Cremo Dairy Feed is the best feed for your cow. Hudson, Hughes & Farnau.

The church at Fairview under the pastorate of Rev. Frank N. Tindler, Jr. donated \$40. to the Y. M. C. C. at its regular meeting Sunday.

What the Allies need most of all is somebody who can best the Kaiser at the war game. They may yet find him. May Heaven speed the day!

Lost on the street last Saturday week a sterling silver card case with monogram "R. G. C." in large letters. Finder please return to this office.

When he peruses his Breakfast Table Newspaper the ex-Czar of Russia no doubt feels like shaking hands with himself for being safe out of Petrograd.

The Danville Christian church, which has been without a pastor since the resignation of Dr. Horace Kingsbury, has called Rev. Madison A. Hart of Columbia, Mo., to its pastorate.

Those desiring to contribute to the Thanksgiving box for the Christian church Orphan's Home will please have their contributions at Mrs. Bruce Lawson's home not later than Monday Nov 26th.

As chairman of the Garrard County Red Cross Chapter, let me urge the farmers to lend to the Agricultural Fair to be held in Lancaster, December 1st, their hearty support. Not only do you exhibit and advertise your own farm products, but you give to the good cause of helping the soldiers in the trenches. H. S. Hudson, Pres.

This extraordinary war in which we are engaged falls heavily upon all classes of people, but the most heavily upon the soldiers. For it has been said, all that a man hath he will give for his life, and while all contribute of their substance, the soldier puts his life at stake, and often yields it up in his country's cause. The highest merit, then, is due the soldier.—Abraham Lincoln, March 18, 1864.

MAYDAN SOLD FOR \$5,000.

Edgar T. Doty, of Richmond, sold his famous gelding, Maydan, at Columbus, Ohio, to an Oklahoma party for \$5,000. Mr. Doty won about \$3,500 in premiums with his great saddle animal, and was first wherever he showed with the exception of the Kentucky State Fair at Louisville, where he was close up in the money but did not get the blues.—Richmond Register.

THEY KNEW BETTER.

Republicans of Garrard county are now kicking themselves for not having put a full ticket in the field for the county and legislative offices. A partial Republican ticket won by a good majority, and they figure that they threw away a seat in the Legislature by not having a candidate for Representative. Representative-elect J. Hogan Ballard, who will serve Garrard county at the next session, is a Democrat and a strong Administration supporter.—Louisville Times.

BOOTLEGGERS FINED.

Last Saturday night Sheriff Ballard captured John Beazley, Herbert Perkins and Sam Short, returning from Lexington with an automobile full of whiskey. They were taken in tow near Hyattsville where they were preparing to unload. All three are well-known colored boys of the town and were taken before Judge Arnold last Monday morning. Sam Short was given a fine of \$75, and cost, while John Beazley got off with a \$60. fine and cost. Perkins confessed and the court fixed his fine at \$50, with the usual trimmings added.

REVIVAL AT BAPTIST CHURCH.

The revival services are continuing thru this week at the Baptist church and large crowds are in attendance. Dr. Dawes is a forceful, strong and eloquent speaker and the public should avail itself of the opportunity to be benefited by his earnest sermons.

COUNTY FUEL ADMINISTRATOR.

No better selection could have been made than the appointment of Mr. H. Clay Kauffman as Federal Fuel Administrator for Garrard county. He has named as his assistants and advisory committee, Judge F. P. Frisbie and J. E. Stormes. Mr. Kauffman has made a wise selection in the naming of these men, whom we predict will look faithfully after the work to which they have been assigned.

They are waiting further instructions from State Fuel Administrator Bryan before beginning their duties.

OVERSUBSCRIBED FOR Y. M. C. A.

Garrard county, as usual, has again come to the front and oversubscribed her apportionment to the Y. M. C. A. war fund.

This county was apportioned \$2,100 and raised, including the \$1,050 which was raised several weeks ago, a total of \$2,243.55, going "over the top" by a nice margin of \$143.55.

Mr. Adolph Joseph, the county chairman and Dr. W. A. Wheeler, together with the assistants, deserve much credit for the work they put into this campaign and everybody should be happy that the amount was oversubscribed.

HUBBARD TRIAL ON AT STANFORD.

The trial of Ed Hubbard for the killing of M. Smith Baughman began last Monday morning at Stanford. The Lincoln county panel was entirely exhausted and by an agreement of the attorneys on both side Garrard county was decided on to furnish the jury. Sheriff Weatherford was then instructed to summons 100 from this county, which he did last Monday afternoon.

The jury was selected after examining about 75 of those summoned and the jury as completed are as follows: W. B. Montgomery, E. Callico, J. E. Montgomery, John Gaffney, Floyd Curtis, H. G. Brooks, Lewis Lilly, W. H. Guiley, Herbert Whittaker, Lewis Murphy, J. W. Daley and Ray Noel.

About 100 witnesses are to be examined on both sides and it will probably take the entire balance of the week.

CITY PROPERTY TO BE SOLD

Next Saturday afternoon the property of W. J. Romans will be sold publicly at 2:30 o'clock. This is a splendid piece of new property just completed and has never been occupied.

The same afternoon at 1:00 o'clock, the residence and store room of W. H. Lackey will be sold. This is one of the best store room stands off of the public square and should readily sell. Both advertisements appear in this issue of the Record.

SELLS \$2,010 FOR 4 CENTS

Little Emmet Green, 6 years old, of Syracuse, N. Y., found \$2,010 in three rolls and before he had reported his find to his parents he sold two, one containing \$1,000 and the other \$1,010 for two cents a roll. The purchases were made by a man, who the boy said he found sitting on a bench in a park. He has given the police a good description of the man. The money belonged to Mrs. Mary Fasaro and her brother, the savings of four years.

JAIL BIRD ESCAPES.

With a spring taken from the mattress of his bed, Ben Moberly, arrested for horse stealing, cut his way out of the jail here last night about six o'clock and is still at large.

The escape was made at the supper hour or just about dark. With the spring he had removed about 100 brick from under the window on the south side of the jail and left a hole that a 200 pound man could easily have gotten through. The bricks being laid with lime and sand, the matter of removing them was easy after the first brick was loosened.

Moberly has served a term in the penitentiary for raising a check and has a bad record. He is about five feet and ten inches tall, wears a short beard and weighs possibly 170 pounds. Being charged with horse stealing a reward of \$50. will be paid by the state for his return to jailer Koss. No other prisoners escaped.

Not a Shiver Can Get In!

THIS IS WHAT THE INSIDE THERMOMETER SAYS

There isn't an icy blast from the great Northwest that can cool down a Caloric heated house below the comfort point!

Thousands of contented Caloric owners would tell you this if you could ask them. We know because hundreds have written unsolicited letters, saying that the Caloric outheats any furnace, boiler or stove they ever knew of, and uses less fuel doing it.

These letters and thousands of other pleased owners are direct and unquestionable evidence that the

The Original Patented Pipeless Furnace

is a wonderful and economic heater; but the best evidence you can get is to install one yourself and experience its comfort in your own home.

The Caloric can be installed in an old house as well as a new. It heats through one register directly up from the cellar into the house, where the warm air circulates to the farthest corner. This is the most natural and healthful way to heat a home—Science says so and Experience proves it true.

The Caloric is guaranteed to reduce your fuel bill by at least one-third. It has a patented triple casing and dead air space (no pipeless furnace can succeed without this) which effectually prevents heat radiation into the cellar—hence fruits and vegetables keep well in a Caloric heated home.

Don't live another winter in a home too cool for health and comfort. Don't continue to burn costly fuel without an adequate return. Install a Caloric and be happy! Come in and see it.

EGGS WORTH \$4,000,000 HOARDED IN NEW YORK.

New York—Continuing his hunt for forbidden food in New York, Chief Flynn of the Secret Service, placed guards Tuesday over \$1,000,000 worth of eggs, unearthed in cold storage here. This discovery brings the total value of hoarded eggs found to \$4,294,434.

Flynn is awaiting advices from Washington before seizing the hoarded foods and necessities here and putting them on sale.

NOT THE ONLY ONE There Are Other Lancaster People Similarly Situated.

Can there be any stronger proof offered than the evidence of Lancaster residents? After you have read the following, quietly answer the question.

D. C. Sanders, prop. of lumber and coal business, Campbell St., Lancaster, says: "I have used Doan's Kidney Pills with satisfactory results and do not hesitate to endorse them. My kidneys were out of order and I had dull, nagging backaches. I also had soreness just over my kidneys, and my kidneys were irregular in action. Doan's Kidney Pills, procured at Stormes' Drug Store, relieved the trouble and put my kidneys in good condition."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Sanders had. Foster-Milburn Co., Props., Buffalo, N. Y.

ACCOUNTING FOR ROAD FUNDS.

Taxpayers who realize what a large part of their taxes are spent on roads and how poor is the average system of accounting for road funds, will be interested in the following resolution recently passed by the County Engineers Association of Washington. "Some system of cost-keeping must be devised whereby all expenditures from road funds from all sources must be classified and segregated, in order that taxpayers and road officials may be informed of details of cost of construction and maintenance of the various types of road. To this end, we recommend that all vouchers for road work, before being allowed by the county commissioners, shall show detail of expenditure, as to place, extent, character and classification of work and that the county engineer be required to collect and fill all such data."

THE GREAT DANGER--POLITICS.

The allies, notably France, seems to be particularly accursed, at this time, with a lot of ambitious men who are putting themselves first, before the great cause, by playing politics, and the gloomiest news issuing from Europe in many days is to the effect that a schism between the allies' political and military leaders is generating.

The French Cabinet resigns under fire. London is all excited over reports that General Haig will not stand for the proposed allied military commission in Russia a dozen groups are fighting for power. Cadorna to go on strike.

On the other side is the kaiser, with all his allies and all his allies' resources in the hollow of his iron hand.

Full control as to diplomatic and governmental management has been the kaiser's strongest advantage from the start and from the start the greatest danger to the allies has been the inability, if not the impossibility, to concentrate.

Their weakness in this particular has already been demonstrated by tons of sacrificed blood and billions of wasted munitions, and to promote this internal weakness it would seem, at this writing, that the selfish politician, a creature more contemptible than pacific, pro-German or any other internal foe of the cause, is coming to the front.

Politics and war mix as do gunpowder and friction matches, and no better. If there ever was a time when the whole people of the United States, down to the infant who can knit a sock should make war their sole business, as a business, that time is now.

We've got to supply Europe not only with men, money and munitions, but with morale, or the present advices from Europe are tremendously deceptive. And it is a crime against God and all mankind not to help the American people understand the matter.

Rheumatic Aches

Drive them out with Sloan's Liniment, the quick-acting, soothing liniment that penetrates without rubbing and relieves the pain. Always have a bottle in the house for the aches and pains of rheumatism, gout, lumbago, strains, sprains, stiff joints and all muscle soreness. Generous sized bottles, 25c., 50c., \$1.00.

Sloan's Liniment KILLS PAIN

Pains and Aches Caused by Kidneys

Many women attribute ailments and suffering to some disease peculiar to their sex, when often the pain and misery is caused by weak or deranged kidneys. Housework, office work or factory work may start the trouble, and dizzy spells, puffiness under eyes, sore muscles, stiff joints, discolored or scanty urine, sleep disturbing bladder ailments, rheumatism or diabetes may result.

When the kidneys are strong and healthy they filter out from the blood the poisonous waste matter. When they are sluggish or overworked they need a medicine to clean them out and invigorate action. Foley Kidney Pills are prepared expressly for the purpose of dissolving all poisonous substances and uric acid that lodge in the joints and muscles and to cleanse and strengthen stopped-up, inactive kidneys. Thousands of men and women in all parts of the country testify to the wonderfully satisfactory results they have had from taking Foley Kidney Pills.

THE EYES OF THE OIL MEN are turned toward Lincoln County. WHY? Because ten(10) producing Oil Wells and eleven (11) Gas Wells have been drilled there in the last few months. THINK OF IT. WELLS only 237 to 250 feet deep, producing 10 to 20 barrels a day. THREE JOINTS OF CASING all that is required. NO WONDER THEY ARE COMING TO KENTUCKY from all over the UNITED STATES. Eight companies or individuals are drilling or getting ready and a dozen more have large holdings in Lincoln County.

WE PROPOSE TO GET OIL. The men at the head of the FLORENCE OIL COMPANY did not go in the business with any other idea. They have been shaping up this territory for over a year. TWO GEOLOGISTS have gone over it and both tried to buy it, and later one offered to drill it for an interest. Others have tried to buy it, but our faith is so great in it that nothing will satisfy us but drilling wells and getting the Production we feel sure we have.

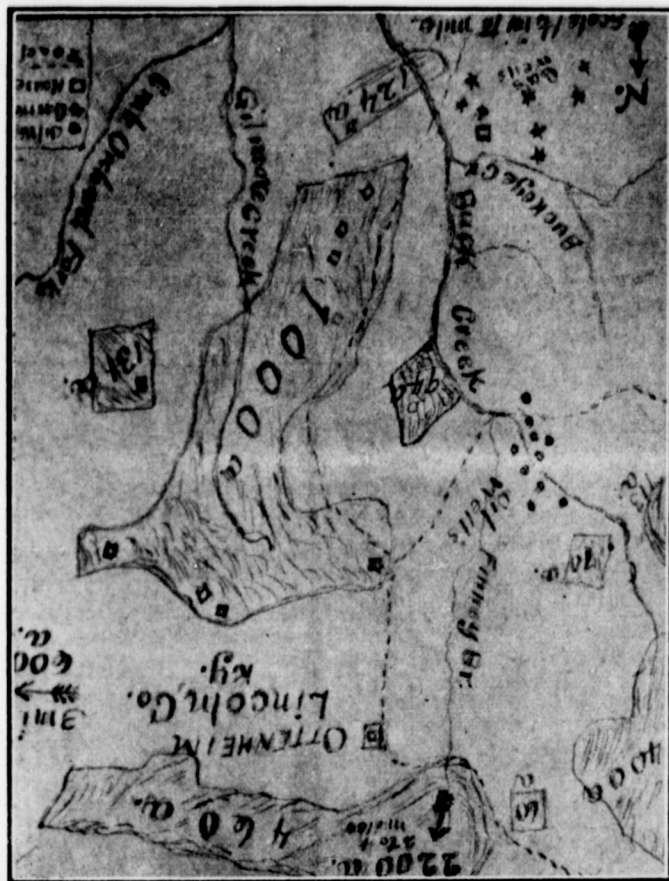

A view of producing Oil Wells on Buck Creek, Lincoln County, Kentucky. Our property joins and surrounds this property.

WE ARE BIG ENOUGH to develop our territory. Get in with people who can do things, with men who know the Oil business, with men of financial ability and business integrity.

Eggs half made are eggs not laid

A hen fed grain alone makes more yolks than white, because grain fails to give hens enough elements for whites of eggs. Wheat, corn, oats, barley, kaffir contain (above bodily maintenance) elements to average 224 yolks and only 154 whites.

Purina Chicken Chowder with Purina Scratch Feed contains elements for 212.33 whites, 214.77 yolks.

Note perfect balance and large number. 50 out of 100 hens eat too much grain which forms fat and cuts down egg laying. Feed 100 lbs. Purina Scratch Feed to 100 lbs. Purina Chicken Chowder—you'll use less feed and get **MORE EGGS—OR MONEY BACK**

Money paid for Purina Chicken Chowder will be refunded if hens do not lay more eggs when fed Purina Chicken Chowder as directed with Purina Scratch Feed, than when fed any other ration. Sold only in check or board bags.

Learning and Forgetting.

The sad defect about the progress of the human race is that while we are occupied in learning one thing we are almost always engaged in forgetting another.

Symmetry Deliberately Lacking.

The Church of St. Basil, in the Kremlin, on Kremlin hill, in Moscow, Russia, is perhaps the only building in the world constructed with a careful view to avoiding all symmetry in color or form.

Had Seen the "Ad."

When formal announcement of Helen's engagement was made in the society column of the local paper, Dicky came running up to his sister, saying: "Oh, Helen, I saw your ad in the paper!"

Ingenuous Four-Year-Old.

A little four-year-old was sent to the store to buy a lemon cream pie. Some time later she returned bearing it triumphantly in her arms and said: "I forgot the name of it, so I just asked for one wif embroidery on it."

Workshop Is Useful.

A convenient building to have on practically any small country or suburban estate is a small structure fitted up with a carpenter's bench and tool closet, with a bin for coal, a recess for wood and a small room fitted up for the storage of household goods or garden necessities.

Weather Has Made History.

All through history, from classic times down to the present, the intervention of the weather has turned the tide of wars. No wonder that commanders, kings and nations used to pray for favorable weather when their fortunes were at stake. There was a time, both in pagan days and later under the Christian cycle, that no army went into battle without offering devout supplications for a fair day or a foul, as best suited their aims.

Why Suffer?

Mrs. J. A. Cox, of Alderson, W. Va., writes: "My daughter... suffered terribly. She could not turn in bed... the doctors gave her up, and we brought her home to die. She had suffered so much at... time. Having heard of Cardui, we got it for her."

CARDUI

The Woman's Tonic

"In a few days, she began to improve," Mrs. Cox continues, "and had no trouble at... Cardui cured her, and we sing its praises everywhere. We receive many thousands of similar letters every year, telling of the good Cardui has done for women who suffer from complaints so common to their sex. It should do you good, too. Try Cardui. CARE OF SEED CORN

Begin Immediately After Gathering and Continue Until the Grain Is Planted.

DRY PLACE IS RECOMMENDED

No Locality Where Crop Will Not Be Bettered by Thorough Drying Treatment—Poor Storage Will Impair Vitality.

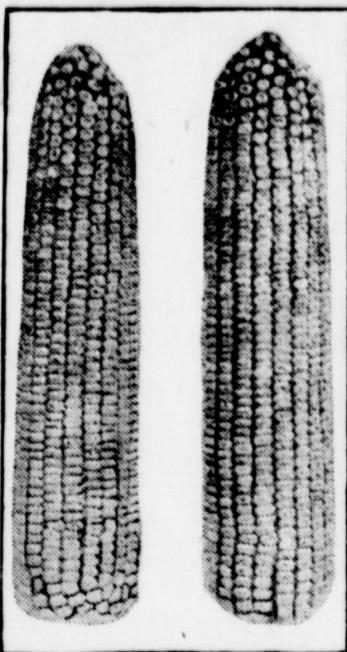

(From the United States Department of Agriculture.)

The same day that seed corn is gathered from standing stalks as they grow in the field the husked ears should be put in a dry place where there is a free circulation of air, and so placed that the ears do not touch one another.

This is the only safe way, according to the United States department of agriculture, which says that much good seed has been ruined because it was thought to be dry enough when gathered. Many farmers think that their autumn is so dry that these precautions are not necessary, yet there is no locality where the corn will not be bettered by a thorough drying treatment. If corn is left in the husk it may sprout or mildew during the winter.

the ears heat or mildew in a remarkably short time.

The best and cheapest treatment immediately after the ears are gathered and husked is to tie the ears singly on binder twine at about eight-inch intervals, the twine being looped about

Excellent Ears for Seed.

the middle of the ears so that they hang balanced and horizontal. Ordinary binder twine is strong enough to support from 15 to 20 ears.

Wire racks are cheaper in the long run and more convenient. A good form is made from welded or woven wire fencing, the upright wires being used as the hangers, and the lateral wires cut off and bent upward being used as supports for the individual ears. The lateral wires, about three inches long on either side of the main upright, are thrust into the butt end of the cobs. These racks will last many years and are easily stored when not in use. In use, with the corn upon them, they have somewhat the appearance of giant fern fronds. The central wire is the midrib of the leaf, and the ears of corn stand out on each side like the fern leaflets, or like leaflets on a locust tree.

Wooden Racks Convenient.

Wooden seed racks, in which the ears are stored in rows on separate shelves, are convenient dryers, and have no drawbacks in a dry, breezy place, although the air cannot circulate freely on all sides and dampness may be held where the row of kernels rests on the wood.

Only during unusually damp weather at seed-gathering time will a fire be necessary to help the drying. Yet if heat is applied in a poorly ventilated place, it will do more harm than good. If used, the fire should be slow and long-continued. It should be below the ears with plenty of good ventilation above them.

ing warm wet weather, and it is more likely to become infested with weevils. Poor Storage Impairs Vitality.

The vitality of seed may be reduced by leaving it in a sack or in a pile for even a day after it has been gathered. During warm fall days, with some moisture in the cobs and kernels,

BEST ATTENTION TO MEADOW

Some of Them in England Have Yielded Enormous Crops of Hay or Been Grazed for Years.

No part of the farm pays better than a good meadow and it should, therefore, have the best attention. In England we find the best meadows in the world. Some of them have yielded enormous crops of hay or been grazed for 300 years. They tell you there that it takes a century to make a meadow. England is also the land of great beef cattle. Good meadows and cattle are inseparable.

Do not fail to top-dress the meadow with farmyard manure, in which 200 or 300 pounds of acid phosphate per acre has been mixed, or the acid phosphate may be broadcasted after applying the manure. If no manure is available, from 400 to 600 pounds of acid or half acid phosphate and half bone meal should be applied. Treat your meadows right and they will return long profits.

SEEK INFORMATION ON SEED

Department of Agriculture Proposes to File Such Intelligence in Answering Inquiries.

(Prepared by the United States Department of Agriculture.)

The committee on seed stocks of the United States department of agriculture is endeavoring to assist in supplying information as to where seeds may be obtained. To this end it will appreciate information from anyone who has seed to offer. The information should contain the name, kind, and variety, and approximately the quantity of seed offered as well as the price asked. It proposes to file all such information and to use it in answering inquiries that may be received from various parts of the country. All such communications should be addressed to R. A. Oakley, Chairman Committee on Seed Stocks, United States department of agriculture, Washington.

CUTTING CORN FOR THE SILO

Best Time Is When Grains Are Well Dented—Pays Farmer to Own His Silage Cutter.

Cut corn for silo when the grains are well dented. This is generally when the lower leaves and husks are beginning to dry up, and the corn is nearly ready to cut for silage.

It pays to have your own silage cutter, so as to fill the silo when the crop is in the right condition.

INCREASE YIELD BY PLOWING

Work Done in Early Fall Is Most Satisfactory—Weeds Are Destroyed and Soil Pulverized.

Repeated trials have shown that early fall plowing gives much better conditions for a crop of green the following year than late plowing gives. While August is a dry, hot month and other farm work presses, it is advisable to do as much plowing as possible. On clean land no further treatment is needed. On weedy land the August plowing should be followed by occasional disking or harrowing, or by re-plowing in October.

Such treatment destroys many of the weeds and pulverizes the soil, so that good supplies of plant food are available during the next season. In addition, it gives a longer plowing season and a chance to do better work. Early plowing and good plowing are important steps in getting better than the average yield.

SILAGE TO CHEAPEN RATION

More Silos Being Constructed Every Year Because of Convenience and Economy in Feeding.

Because of the economy and convenience in feeding silage, more silos are being built every season. This year will likely see a larger number erected to "can" the corn crop.

Seventeen per cent more milk and 28 per cent more butterfat was produced by dairy cows fed largely silage than by others fed mainly a grain ration in a feeding test conducted at the Ohio experiment station. The silage ration produced butterfat at 13 cents a pound, and the grain ration at 22 cents. Two pounds of dry matter can be produced in the form of silage at less cost than one pound in sugar beets, other tests have shown.

CONTROL OF SHEEP SORREL

Quicklime Can Be Used to Advantage by Slaking With Water and Sprinkling Mixture.

The usual advice for the control of sheep sorrel is to apply ground lime-stone, two tons per acre, hydrated lime one and one-half tons per acre, or quicklime one ton per acre. The quicklime can be used to advantage by slaking with water and sprinkling the mixture freely over the sorrel. The liquid will injure the leaves of the sorrel as well as help correct the soil acidity.

Don't Buy a Wagon Until You Have Seen the Columbus

Before you decide on any wagon, examine the Columbus. Strongly built of the best possible material the Columbus wagon gives the most satisfactory service for the longest period of years. There is no secret in the notably long life of the Columbus wagon. It is the result of the methods employed in construction. There is no wood in this wagon which has not been selected under shelter and seasoned to two years.

The axles and the spokes of the wheels are hickory; the boards, bolsters and seat are made of oak, and the bottom of the box is straight grained hickory planks. These are not a few examples of the care which is taken to make this wagon as reliable as possible. The result is that the Columbus wagon is unbeatable in reliability and endurance. Come in and examine it for yourself. Satisfaction is guaranteed.

THE BEAUTIFUL GULF COAST. GULFPORT, MISSISSIPPI.

Mississippi is a land of romance and interesting history, and she has furnished some famous men who have had spectacular careers. Mississippi was found by old world explorers to have a fine climate and many fascinations. Two centuries ago DeSoto, Joliet, Marquette, Iberville, Bienville and LaSalle had a "vision" of the civilization of Mississippi of today. Mississippi has had one hundred years of statehood and she expects to celebrate her Centennial near Gulfport in 1919.

At Gulfport is a railway pier extending one mile into the Mississippi Sound. It gives dockage facilities to foreign vessels and makes the harbor a gateway to the interior of the state, and south to the Panama Canal region. Gulfport is thus famed, together with its land connections along the line of the Louisville & Nashville Railroad for its accessibility from and to all points north, south, east and west.

The city of Gulfport has attractive homes, fine churches and schools, and an aggressive wide-awake people. She has also about her, fruit lands and garden spots for the settler from the north. She has in her Great Southern Hotel a fine up-to-date hostelry. Gulfport is on the beautiful Shell road also, that extends for miles along the edge of the Sound. It is a fine breeze one gets at most any day of the year, when aboard that electric line that runs along the very waters edge. The golf links, a few miles east of Gulfport are an attraction on this line; also the Military Academy and beautiful Beauvoir, that was once the home of Jefferson Davis, and which is now a harbor for the Confederate Veterans of the South.

If, while sojourning at Gulfport, you are weary of golfing or boating, why then in the moonlit nights or dark nights you can go searching for "flounders"—when the tide is out. It is a picturesque sight to see men and women, who live along the shore who often at night are thus engaged. By the aid of the light of their torches they enjoy this sport. No doubt many find it an economic pastime.

Gulfport is a coming city of some size! Strangers are cordially welcome either to visit for a time or to add their interest to that of many others who come for the attractions and well-being she offers to all who may wish to share them with her. —Carlyle Porter.

Gulfport is one of the attractive resorts located on the Beautiful Gulf Coast and reached by the superb steel passenger trains of the LOUISVILLE & NASHVILLE RAILROAD.—Advertisement.

"SOMEWHERE."

Within the last year or two the word "Somewhere" has come to have a new meaning. It has been lifted out of obscurity and put into a place of prominence and distinction. A dispatch appears in the daily papers from "Somewhere in France;" a letter arrives from "Somewhere in Russia;" a report leaks in from "Somewhere in the Balkans."

One by one the lads from our homes have been slipping away, and have been going, as soldiers, surgeons, ambulance drivers and in various other noble capacities, to the land of "Somewhere." And hosts of nurses and other women, with eager desire to serve the need of humanity, have gone overseas, too, and are at work in the same distant "Somewhere Land."

Eyes dimmed by tears have tried to pierce through the veil that hides the country of "Somewhere"; and hearts that have a new ache are waiting with patience to learn how those they "have loved long since and lost awhile", are faring in that mysterious "Somewhere"—place of sacred service and sacrifice. Have they crossed safely the seas that are infested with the stealthy serpents of death? Have they set foot upon the land whose voice has been calling pitifully for help in its extremity? Are they now ministering to the need of their brothers in distress? Are they standing shoulder to shoulder with their comrades in arms, and doing their part in thrusting the invader from the devastated land? Have they paid the price of their devotion to humanity with the red blood of their sacrifice? Oh, what is the word from "Somewhere Land?"

It is a wonderful land, "Somewhere" that lies concealed behind the curtain of secrecy; for marvelous things are going on there. The best that is in men and women is fighting with determination born of desperation against the worst that is in them—and the best is coming to the mastery. All the great virtues are finding untrammelled expression in "Somewhere Land"; for it is a land where exchanges are being made, and men are bartering their brass for gold, and their iron for silver, and their wood for brass, and their stone for iron. The higher values are coming to the supremacy, and many things that were thought to be inestimable are being discovered as worthless, while other things that were held in disdain are emerging into honor.

God is melting the peoples anew in "Somewhere Land;" and out of the refining fires will come a better world, a truer brotherhood, a broader sympathy, a deeper devotion, for character is being tried in the crucible in the country of "Somewhere", and service is being coronated, and sacrifice is being sanctified, and humanity is seeing God in a new way "over there".

And hovering over "Somewhere Land" is the Spirit of that Great Soul who said that a man could show no greater love for his fellow man than to lay down his life for him; and that teaching is sinking into the consciousness of those who are now in the country of "Somewhere," and they are doing what He did who came not to be ministered unto, but to minister. And to give His life as a ransom. God have all those who have gone to "Somewhere" in His protection and mercy, and bring them all back again in safety to the hearts that love them, and that yearn after them, and that hold them always before His throne!—Christian Advocate.

Death to Moths.

If moths get into the closet, saturate a cloth ten or twelve inches square with formaldehyde; hang cloth in the closet and close up tightly for twelve hours. The same plan may be used in chests, trunks or boxes, where clothing is stored. The fumes will kill moths as well as their eggs; also germs of any kind. No odor is left in the clothing.

TWINS MONTH APART.
From the vicinity of Scotts Mills, Oregon, comes a story indicating that the days of miraculous events are yet in evidence. Harve C. Hartman, born and reared in that section of the country noted for its verisimilitude, claims to have a 3-year-old Jersey cow which gave birth to a Jersey heifer calf on September 22 last. On October 23, just one month and one day later, the animal gave birth to a Hereford bull calf. Both are living and in a healthy condition. Mr. Hartman is as proud of the cow as the animal is over the belated twin.

THE DRAFT AGE.
It has been suggested that the age limit for the draft be reduced from twenty-one to nineteen years. In times past the theory has been advanced that in giving a youth military training he ought to be taken when about nineteen. These are two separate propositions. The desirable physical discipline, the orderly habits, the feeling of responsibility which comes with peace-time training is much different from the intensive work-out and the rushing into the trenches which the young men of the national army must have when they go into the present war.

WHY STOCKS TUMBLED.
It is said that a visit to Wall Street in the early part of last week was like a trip thru No Man's Land, minus the danger, tho just as depressing. Each day prices have been forced down until they touched what would seem bottom prices. Even steel and railroad stocks went down 3 to 6 points in one day and gilt-edge bonds 1 to 2 points a day. Any answer to the cause of this panic and almost closing the doors to this Stock Exchange is only a guess but the obvious reasons are, first, the demands of the Liberty Loan; second, the collateral demands of the war, the Red Cross, and the numerous charities which make such inroads and demands on ones purse; third, the vast needs for new and quick industrial investments to meet the munitions and supply demand of the war; fourth, the uncertainty of the immediate future.

Voice of Envy.
"Did I understand you to say that Mr. Grabcoin has more money than he knows what to do with?" "No. That is merely the point of view held by some of Mr. Grabcoin's neighbors who think they could enjoy life a great deal more than he does, if they only had his money."—New Haven Journal.

Daily Thought.
Neither let mistakes nor wrong directions, of which every man, in his studies and elsewhere, falls into many, discourage you. There is precious instruction to be got by finding we were wrong. Let a man try faithfully, manfully to be right; he will grow daily more and more right.—Carlyle.

Unkind Comment.
The death recently took place in Ireland of a well-known singer who had a massive physique. This was rather a drawback in the case of certain sentimental songs which were hardly applicable to his girth. One night, when in Dublin, he gave as an encore, the well-known Irish song, "I'm sitting by the stile, Mary, where we sat side by side." An irreverent person in the gallery exclaimed: "Ah, shure, there wouldn't be room for the two of yez now!"

Fine Chance for Axel.
Being firm friends, Marie's two lovers decided that one must end his courtship to help the other. When Axel suggested "head or tails" no coin was at hand. He agreed to the use of Sandy's pocket knife, but was ill prepared for his friend's words as the knife shot upward: "If the knife stays up you win!"

Towel and Medicine Closet.
A good idea for a towel and medicine closet or cabinet in two bathrooms which have a common wall is to divide the one closet space into thirds laterally. The upper third forms the two shallow medicine closets, back to back, with a mirrored door in each bathroom. The other two-thirds extend through the depth of the closet and are used for towels. Each of these divisions opens into one of the bathrooms.

WAR NEWS OF THE WEEK

The Italians, whose situation is grave, have made a stand along the Paive River and in spite of the masses of Austro-German forces hurled against them the line has not been broken. News comes that they hemmed in 1000 Huns and took them prisoners.

General Booth appeals to the American Salvation Army to give aid to the Italian refugees who are pouring into Milan, Genoa, and Rome from the stricken war regions.

Discouraging news comes from Russia where the Revolutionist party has put to rout Kerensky and his army who have been loyal to the cause of the Allies.

The Swiss people regard the rumor that they had been asked by the Allies to break their neutrality as only a German pretext to seize upon their railroads in the moving of troops thru their territory to Italy. The official department of that country states that there is no foundation whatever to the rumor that they have received any such request.

In this great world wide struggle the eyes of the world are turned upon America, that is expected, from now on, to play the leading role. Germany is now singing her hate song to America and turning and intensifying her fire upon them while the Allies take renewed courage and hope since America's soldiers are upon French soil and fighting with them side by side, and in the forefront trenches, they are taking their stand for the democracy of the world.

It is believed that Gen. Haig is planning a great drive along the Flanders front toward the town of Roulers, an important railway line serving the German front from the North Sea southward.

The British troops in Palestine are giving the Turks no rest and it is stated instead of standing and offering battle the Turks are steadily retiring northward.

It is interesting to read of the work of reconstruction that is being already accomplished by the American Red Cross now at work in Belgium and France. This work of reconstruction that was so systematically planned and carried into operation by the Germans when they would evacuate a town, was complete and sure. The officers of the army would first assemble the people together then go into their homes and cathedrals and take from it whatever of especial value they saw—then they

would turn the property over to the soldiers who would further loot it of what was left. After it was stripped of all that was worth considering they would place dynamite in the centre of the building and complete the work of destruction. The more valuable the property the more attention was given to its utter destruction. Now the Red Cross seeks to restore some of these villages and bring back to their native regions the original inhabitants if alive and can be found. Many Americans are devoting their time and means to this work of humanity.

Former President Taft has been speaking in the interest of the Y. M. C. A. War Fund. He urges all to be loyal to President Wilson and avenge the crime of the sinking of the Lusitania which was the same in principle as the Huns invading American soil and murdering our women and children.

Explorers Simply Groped.
It used to be told of the early explorers of the Mississippi that, after entering the delta, they never knew how they got inside, and that, after passing through it to the gulf, they never knew how they got outside. It was many years before the navigators fixed upon landmarks which enabled them to steer in anything like a straight course.

Practice Economy.
The sane standard, "Eat enough food and no more," rigidly followed, would reduce greatly food bills in many homes and at the same time tend to improve the physical condition of all members of the household.

Mothers Thank Us
Keep your growing girls free from colds and weakening coughs and you are helping them to healthy vigorous womanhood. Thousands of mothers have written letters of thanks, telling what

Foley's Honey and Tar has done for their daughters in ridding them of coughs that "hung on" and weakened them just at the age when the young girls required all the physical strength they could command.

Foley's Honey and Tar is noted for its quick effect on coughs, colds and croup.

Mr. Ada Sanders, Cottontown, Tenn., writes:—"We use Foley's Honey and Tar as our best and only cough remedy. It never fails to cure our two girls when they have colds."

Old Form of Investment.

The oldest investment the world knows is the real estate mortgage. Twenty-one hundred years before Christ, in ancient Babylon, money was loaned on mortgages. These mortgages were recorded on bricks and preserved in great earthenware jars that were sunk in the earth. They were dug up after they had repaid there 3,300 years, mute evidence of this most ancient form of investment.

What About Speculation

An experienced stock broker, after retiring from business, made this significant remark: "I have never known a business man to speculate two years successfully." The fall of many a man may be traced to speculation. It is unsafe for any man with a limited amount of money to risk it in speculation. The Bank is the best and safest place for surplus money.
